Angelique Lee, JD, CCEP, HCCP+

Principal, Strategic Advisor

Golden West Compliance Solutions

Angelique.lee.esq@outlook.com

Angelique Lee, Esq. was most recently VP and Global Chief Compliance & Ethics Officer for Jazz Pharmaceuticals. She previously served as CCEO for GW Pharmaceuticals PLC, US General Counsel and Global Compliance Officer for Greenwich Biosciences/GW Pharmaceuticals, and VP Legal and Compliance for Spectrum Pharmaceuticals. She started her career in R&D at Diagnostic Products Corporation, which was later acquired by Siemens AG. Angelique held various positions throughout the company, attending Loyola Law School in the evenings while maintaining her career, eventually finding her passion in life sciences law and ethics, as Dir. of Compliance at Siemens Healthcare DX.

Angelique is a seasoned life sciences corporate counsel and CCEO with a strategic business and relationship-minded approach to compliance and ethics. As a leader in the global compliance team at Siemens AG's Diagnostics division during their pivotal years after a major corporate corruption scandal, Angelique honed both her skills and professional philosophy around corporate compliance and ethics within the life sciences, particularly given its impact to international healthcare systems and most importantly, patients.

At GW, Angelique combined behavioral science and the law to create her branded I-CARE approach, based on the principles of Integrity, Compliance, Accountability, Respect and Ethics to enable companies and the people who work there make ethical decisions and realize that doing the right thing can also be good for business. Following an acquisition by Jazz Pharmaceuticals, Angelique was named Global CCEO of Jazz and brought the I-CARE approach to navigate Jazz' Corporate Integrity Agreement to successful completion in August of 2024.

Angelique is now focusing on helping other CCOs to enhance the effectiveness and efficiency of their programs and teams by empowering them with data, AI, and behavioral science techniques to tailor their own data-driven, human-centered C&E programs.

Outside of work, Angelique loves to share her passion for ethical business by teaching classes in Medical Products Law & International Compliance at the University of Southern California School of Regulatory Sciences, and part of Stanford University's Masters in Translational and Applied Medicine (M-TRAM) program, where she also serves on the Advisory Board. Angelique also serves on the Advisory Board and is an active volunteer with the award-winning local Capistrano Valley chapter of the Boys and Girls Club, with an emphasis in providing opportunities for STEM education and career opportunities.

Angelique is a mother to her 12-year-old son. She lives near the beach in Orange County, CA and still enjoys traveling the globe, experiencing new cultures, food, music, languages, talking about healthcare and ethics, and trying to find ways to make the world even a little better than when we found it.
