Healthcare Compliance
Certificate Program

Hugo Acurio

*Fractional COO, AI Compliance for Healthcare & Pharma ·
Founder, IRIS Global Ecuador*

Hugo Acurio is a healthcare operator who builds AI an auditor can trace. He works as a fractional COO for US telehealth, diagnostics and pharmacy companies scaling from \$5M to \$150M, and on AI compliance for pharma and device companies operating in Latin America.

At HelixVM he ran the patient-operations engine behind 100K+ patient encounters over ~18 months, inside the HIPAA perimeter. Human-in-the-loop AI intake lifted conversion 40% and cut appointment time 50%. At Fenix Pharma he shipped a production AI sales agent in 13 days, with an audit trail behind every step. At Iris Global Ecuador, the company he founded, he took a 23-person org from operating losses to sustained profitability, earned a top 5% GDP certification, and is launching a regional pharmacovigilance platform ahead of ARCSA's November 2026 standard. Earlier, at Omron Healthcare LATAM: 300% regional growth and a #1 market ranking.

His rule: the AI suggests, a human decides, every step leaves a record.
